

The Qu'Appelle Progress.

Vol. XI.

QU'APPELLE STATION, N. W. T., THURSDAY, APRIL 2, 1896.

No. 25.

Boots & Shoes.

I have just opened eighteen cases this week. Please call and see them. I have them in all sizes.

J. P. BEAUCHAMP.

J. A. Lidgate,
Lumber, Shingles, Lath, Doors, Windows, Mouldings, Building, Paper, Etc.,
Lowest Prices.

DENTAL.

W. D. COWAN, D.D.S., SUB-GENERAL DENTIST, visits Indian Head on the second Friday and following Saturday of every month; Qu'Appelle, Leland Hotel, on the Wednesday and Thursday preceding.

LEGAL.

A. D. DICKSON, Barrister, Advocate, Solicitor, etc. Office, first door south of the Queen's Hotel, Qu'Appelle St.

W. M. SMITH, Advocate, Notary Public, Collections and Real Estate Agent.

MEDICAL.

D. A. C. BARTHELEW, Qu'Appelle, Physician, Surgeon, Coroner Etc. Graduated from Toronto University and Licentiate College Physicians and Surgeons, Ont.

W. HENDERSON, M.D.C.M., Qu'Appelle Station, Graduate of McGill University, Montreal.

MISCELLANEOUS.

(1.) For the North West Territories. Sides concluded on the shortest notice. A range of land can be made at my Office, or at the Dominion Office, Qu'Appelle.

A. H. BELLINGHEAD, House, Sign and Ornament Painter, Graining, Glazing, Paper Hanging and Kalamining. All work made and promptly executed. Qu'Appelle Station and Indian Head. A. Carre, assistant manager of Indian Head branch.

S. H. COLLINS.
BOOT AND SHOE MAKER.
Next door to Creamer's drug store, Qu'Appelle.

F. H. ROBINSON, HOUSE, SIGN AND Ornament Painter, Graining, Glazing and Paper Hanging. Kalamining a specialty. All work promptly executed. Qu'Appelle Station and Indian Head. A. Carre, assistant manager of Indian Head branch.

FOR SALE OR EXCHANGE.

PYNY-PECTORAL
Positively Cures
COUGHS and COLDS
In a surprisingly short time. It's a scientific certainty, tried and true, soothing and healing in its effects.
W. C. McCOWAN & Co.,
Bismarck, Ont.
Report in a letter that Pyny-Pectoral cured Mrs. C. Gwynne of chronic cough, who had been treated by a long list of doctors, and also cured W. G. Macdonald of a long-standing cold.
Mr. J. H. Hurry, Chemist,
125 Young St., Toronto, writes:
"As a general cough and lung remedy Pyny-Pectoral is a most valuable preparation. I have given the utmost satisfaction to all who have tried it, many having declared it to be the best remedy they have ever used. It is a scientific certainty, tried and true, soothing and healing in its effects. The sale with me has been wonderful, and I can safely recommend it as a safe and reliable cough medicine."
Large Bottle, 50 Cts.
DAVIS & LAWRENCE CO., LTD.
Sole Proprietors,
MONTREAL.

THE
Qu'Appelle : Progress
PUBLISHED EVERY THURSDAY
At the Printing Office, Qu'Appelle Station,
Assn., N.W.T., Canada.
Subscription Price \$1 per annum in advance; \$1.50 if not so paid.

The publisher reserves the right to refuse to insert advertisements of a questionable or objectionable character.
A liberal commission allowed to parties willing to act as agents for the paper.
FREDERICK HELL,
Editor and Prop.

THURSDAY, APRIL 2, 1896.

SMUT AND BLUESTONE.

The season when to "pickle" wheat is at hand and the experience of such practical men as Mr. James Elder, of Virden, with reference to all growers of wheat and other grain.

Mr. Elder, in an able article in the Farmer's Advocate for March 20th says: The farmers of Manitoba and the Territories have suffered disappointment from various causes, but he believes the most fruitful cause has been smut. It is estimated that before the first of March, 2,500 cars of smutted wheat were inspected at Winnipeg, which means a loss in price alone of at least \$200,000. Add to that the large quantity which has been used for seed; then add to these the shrinkage in production, which he thinks he is safe in saying would average one-fourth on the smutted quantity and it will be seen that the loss in wheat was very great. But the loss was not confined to wheat alone; there was a great loss on coarse grains as well, the loss in oats, however, not being so noticeable because, except when the oats are bought for milling, the price is not seriously affected; there is, however, a serious shrinkage in the yield. A significant feature in this matter is the fact that while the loss from frost cannot be prevented in this country, and loss from drought cannot be avoided in any country, the preponderating weight of evidence goes to show that loss from smut can be avoided. A great many people are sceptical upon this point, and perhaps never more so than at the present time, due to the fact that a great many thorough farmers declare that though they pickle their seed they still have smut. Mr. Elder is frank to admit that statements like these, coming from such men are perplexing. This apparent failure, however, he believes is due to one of three causes: 1, inferior bluestone; 2, defective application; and 3, the volunteer crop. The last can only be avoided by securing the germination and destruction of the scattered grain before seeding. The first we trust will be avoided this season by allowing none but the genuine article to be placed on the market. The removal of the second is the object of this article. Mr. Elder is of opinion that the defects in the sprinkling system have been (1), not using enough water; (2), not turning the wheat sufficiently after being

sprinkled. His practice is to use about one pound of bluestone to eight or nine bushels of wheat, and about a pail of water to three bushels of wheat, or in the proportion of one-third of a pound to each pail of water. The bluestone is first dissolved in hot water and then the cold added. Mr. Elder then goes on to say:

We use a water-tight box, which we fill about two-thirds full of wheat, leaving one end of the box empty; two men with shovels standing one on each side of the box. I then sprinkle, or rather, I wash the liquid on the surface of the wheat, beginning at the end of the pile nearest to the empty space. Meanwhile the men start to turn, pushing their shovels forward into the pile and throwing the wheat back overboard. In this way thoroughly turning it whilst the liquid is sprinkled on. An important point just here, that when the men are turning the pile, the shovels should be pushed in, but when brown on grain which is in motion it is much more evenly distributed. I manage to get about half the liquid dissolved in the first turning, the balance in the second turning. We then turn it at least three times more and leave about five hours.

Oats and barley we prefer to immerse, for the reason that it is impossible to reach all the intricacies in the husk by the sprinkling process. Some advocate the use of a sack, into which the oats are put, and then shake under the water. The arguments in favor of this system are speed and ease. My objection to it is its unhomeliness, for the reason given.

I much prefer the following process: Provide two men, or boys, with a bushel of three-quarter inch hole near the edge of the bottom of each, make a plug to suit. Set these barrels on a platform sufficient high to admit of a rail being the edge of the barrel, have the hose project over the edge of the barrel, and pour the contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty the remaining contents into a wagon, enough liquid to just cover the oats, etc., and then with one pail below the hole and another in reserve, pull out the plug and drain of the liquid, pouring it into the other barrel. When the liquid is drained off, empty

QU'APPELLE PROGRESS.

Thursday, April 2, 1898.

THE NEWS OF THE DAY.

CONDENSED FOR BUSY PEOPLE.

Short and Interesting Paragraphs that
Treat of Men and Things in a
General Way.

S. A. Hyman, of Belleville, has assigned
after 21 years business with assets of
\$5,000.

Alexander B. Cameron, one of the old-
est residents of Finch township, and a
veteran of 61, is dead. Deceased was 61
years of age.

It is announced on apparently reliable
authority that Hon. Geo. Kirkpatrick
will be the Conservative candidate for
Kingston in the general election.

Four hundred persons signed petition
in Victoria praying the government to
renew from the school board the right
to charge fees for attendance at the high
school.

H. M. S. Goss, which arrived at Es-
quimaux a few days ago, has been ordered
by cabinet to proceed at once to Hong-kong
to protect British interests there should
revolution erupt.

A Calgary exchange says that, owing
to the miners in the north having no
money to pay for the coal, the White
Star mines have had to advance wages
to keep the mines working.

An evangelist who has struck Spok-
okane and even beyond the constabulary
regularly attend the services. It has
not yet been learned whether or not the
lamp has been taken to flicker.

William Scott, son of Kent, York-
shire, Eng., died at Victoria the other
day. He was 61 years of age. He had
been in the city for some time.

John Wickham, an employee of the De-
partment of the Interior, died at Victoria
the other day. He was 61 years of age.
He had been in the city for some time.

The authorities are investigating the
circumstances attending the death of
Erik, an employee of the New Van-
couver Hotel. The death of Erik was
caused by a fall from the roof of the
hotel.

J. Knowles, who has a place chain at
the mouth of the Fraser river, has
struck it rich. He has found a large
quantity of gold.

He worked on the ledge and secured 150
in one day. He has now a large quantity
of gold.

The central part of Toronto narrowly
escaped a great conflagration the other
night and early today the blaze forced
a retreat of the fire.

A fire broke out in the city of
Victoria the other day. It was caused
by a fall from the roof of the hotel.

A fire broke out in the city of

IN FAVOUR OF THE DOCTORS.

Dr. Goddard, M. P., of Anner, Que. Speaks
in Highest Terms of Agnew's Catarrh
Powder.
When a member of the medical pro-
fession, hedged in as he is by a large
measure of conservatism, expresses an
opinion of a proprietary medicine it
means a good deal. Dr. Goddard, the
popular member in the House of
Commons, of Quebec, Quebec, speaks
in highest terms of Dr. Agnew's Catarrh-
al Powder, not alone as a professional
man, knowing the nature of the remedy,
but from personal experience. He has
used the remedy for catarrh, and freely
tells the public of the remarkable,
speedy and effective nature of the medi-
cine in all cases of the kind. One part of
the powder gives relief in 10 minutes.

Sample bottle and blower sent by S. G.
DITCHON, 11 Church street, Toronto,
on receipt of ten cents in stamps, or sil-
ver.

Regard Hoggard (at the door)—I'm
killed at my post, maddam, but I can't
get nothing of my profession. Miss
Snapperton—If I'm what you want, I'm
not. Regard Hoggard—I am an anglo-
maniac.

MAKING UNNECESSARY ANY PAINFUL
OPERATION.

How South American Kidney Cure Re-
moves Pain and Stems Periods of
Distress.

It was chronicled in the local press a
few days ago that one of Toronto's best-
known physicians was leaving for a lead-
ing United States hospital, their doctor
operating for a hard formation of the
kidneys. Everyone will hope that the
expert will prove a success. But a
more potent remedy than cure, and
case assert themselves, let that wonderful
specific, South American Kidney Cure
be taken, and the trouble is speedily
banished. What is just as encouraging
to the patient, even in extreme cases, re-
lief and cure is quickly secured by the
use of this medicine.

Old Maid—Is this the newspaper office?
Clark—Yes, m'am. Old Maid (blush-
ingly)—I see the mayor has advertised
for proposals, and I would like to adver-
tise, too.

PROSTRATED FOR WANT OF BREATH.

Extreme Case of Heart Disease Cured by
Dr. Agnew's Cure for the Heart.

There is one comfort in the thought,
that Dr. Agnew's Cure for the Heart,
is seldom unsuccessful. One of the many
illustrations is found in the case of James
M. Clark, of Stephens, N. B., who says: "In
1881 I was troubled very much with in-
ferior palpitation of the heart, and great
pain in my side. My breath was very
short, and with the least extra exertion,
I became fully prostrated for want of
breath. I was attended by a physician
for a long time. When I was in a dis-
tress I visited the local drug store, and
my attention was drawn to Dr. Agnew's
Cure for the Heart. I obtained a bottle
and before I took half of it I felt over a
great deal better, and to-day I am a sound
man, owing to the use of this remedy."

"I" waited the poetic young man, "am
ever remembered." "Then," asked
the young man, "why do you not try to
talk United States."

A Vancouver Fruiter.

In British Columbia rheumatism is
very prevalent, and very hard to cure
owing to dampness of atmosphere. Mr.
J. Balfour, the well-known fruiter of
Vancouver, B. C., says: "I suffered in-
tensely from rheumatism for several years,
and my attention was drawn to Dr. Agnew's
Cure for the Heart. I obtained a bottle
and before I took half of it I felt over a
great deal better, and to-day I am a sound
man, owing to the use of this remedy."

Long pale yellow snail shells in green
leaves are worn with this costume,
and a black feather fan is carried.

Such a gown might be worn at a din-
ner party or any full-dress evening en-
tertainment, and is equally appropriate as
a costume to be worn by the bride's mother
at a wedding.

Carnations Again Popular.

The carnation, with its rich bloom, ex-
quisite fragrance and hardness of petal,
is once more springing into favor, and
florists say, so popular has it become
in the last few weeks, it is difficult to
meet the demand with the perfect
quality of bloom that is the order of the
fashionable set. For the struggling at-
tenuated flower that is sold on the street
corner for a cent a dozen is not by any
means the carnation that is seen on the
laid of the social youth or at the carriage
of the belle of the Patriarch's hall.

The carnation of 30 has a mass of
fringed petals that measure three inches
across and round up like a tiny bouquet.
The stems are cut in a high bouquet
and the foliage is cultivated to
a wonderful degree of perfection.

A carnation much in vogue for the
theater and reception bouquet is the "Pae-
ony." It is large and substantial, and
the distinct fluted color. Its variety of
color, combined with sprays of lilies
of the valley, is a favorite "coming out"
bouquet for the midwinter debutante.

The Scott is a deeper shade of pink
blossom, and used with deep red and
purple carnations in a high bouquet
inspiring three-quarters of a yard in
diameter, is much affected by the fash-
ionable matron.

Closely packed bunches of six or eight
carnations are the latest thing in the
country, and it is said, are running
violet very close.

New Place to Carry a Watch.

A pretty woman wore her watch well,
where do you suppose? In her neck,
but a pretty woman would think of
putting it in such a place. As the young
lady says, "I'm a watch." One of
the latest fashions in the stage drama
to reveal in her costume that she
thought a white satin necklace was a
cheap piece for a watch. The owner of
the tiny gold timepiece, which was not
larger than a medium sized button, was
of the brilliant brunette type and I've
seen a mettlesome black pony a eyes flash
as hers did when she lifted her hand and
jerked out of her soft satin stock her
watch. She tucked it back a quarter
of an inch beyond the turn of her ex-
quisite chain, and the blue enameled fol-
chain, with its tiny ball, dangled un-
obtrusively just below the throat band of
the white satin vest that completed her ex-
tremely modish attire.

Judge Murphy, of Chicago, has de-
cided that betting on a horse race is not
common gambling. Tom Walsh, the St.
Louis bookmaker, was with ten assist-
ants, arranged at Murphy's court on a
charge of keeping a common gambling
house. Walsh raised the point that bet-
ting on a horse race was not common
gambling, and showed this form was all
his place meant. Judge Murphy
granted the point and quashed the in-
dictment.

Raggon Tatters. You don't know
what it is, partner, to be dressed down
by everybody, with no friend's no notice.
The other—Don't I, I'm a baseball un-
der.

South American Kidney Cure for
Rheumatism and Neuritis radically
cures in one to three days. It acts upon
the system is remarkable and mys-
terious. It removes at once the cause,
and the disease immediately disappears.
The first dose greatly benefits. Seventy-
five cents.

Sold by all druggists.

Wallace—Do you think electricity will
be much in use during the next war?
Ferry—In the next war? Why the
Spaniards are winning most of their
battles with it right now.

ORE FROM KOOTENAY.

Magnificent Sample Retrieved at the C. P.
R. Mines.
There are findings of gold at Cripple
Creek, Colorado, and on the Yukon, in
Alaska, but it is questioned if they are
rich in the precious metals as what is
now being turned out in the Kootenay
country and in Lake of the Woods dis-
trict. At any rate there are no such
fields of mineral wealth as in British Col-
umbia, as developments within the next
two months will probably show. In the
Slocan Trail Creek and Nelson districts
there are already over 2,000 mines on
which considerable work has been done
and by the opening of spring operations
on many more which have already been
prospected, will commence.

A former resident of Winnipeg has set
a sample of ore to the general passenger
department of the C. P. R., taken from a
mine newly opened near Sandon, and
which in bulk weighs 15,000 lbs. per ton,
and he writes that in the same neighborhood,
and also in the Laradean district, quite
close to the main line, near Revelstoke,
several very rich findings have been
made and it is expected that by the time
the snow that is now on the mountains
is gone, the sample will be the rule all
over the Kootenay country. Though the
sample is only about the size of a man's
hand it weighs 120 pounds and is a
beautiful piece of ore.

Business men, miners and mechanics
are already flocking into the country and
the business has assumed such dimensions
that the C. P. R. has had to increase its
freight rates. The ore is being shipped
to Revelstoke, and from there to the
docks, where it is being loaded on the
ships for export.

"Comrades, I find it impossible to
describe the sense of sorrow with which
I am overwhelmed to day at receiving the
details of the great loss which has
fallen upon us in the action of my son,
your late comrade, Every high partici-
pation of my heart for him for nearly
four years.

John Wickham, an employee of the De-
partment of the Interior, died at Victoria
the other day. He was 61 years of age.
He had been in the city for some time.

Local and General

—Mrs. Thos. Carrol, of Strathcarroll, is very ill, we are informed.

—Tomorrow, being Good Friday, the stores will be closed at 12 noon.

—The Bishop of Qu'Appelle will preach in St. Peter's Sunday evening.

—Mr. Brine, Fort Qu'Appelle, was in town on Saturday and Sunday.

—Mr. W. McNaughton arrived back from the east on Tuesday morning.

—A census of Manitoba will be taken this year by the Dominion government.

—Mrs. F. McNaughton, of Springfield, who has been seriously ill, is reported improving.

—Mr. Joseph Craig's daughter, Dora, who has been ill for some time, is getting better.

—Mr. J. Moriarty is again in town visiting acquaintances after a short trip to Missouri.

—Rev. Alex. Grant, of Winnipeg, left for the city on Monday to attend the Baptist conference in England.

—Several would-be settlers have arrived during the last few days, and are now engaged spying out land.

—Don't forget the Footballers' Reunion in the town hall, on Thursday evening, April 16. Sure to be a good time.

—Mr. Webster's auction on Saturday last was well attended. Good prices were obtained for most of the articles offered.

—Rev. Hunter Boyd left for Winnipeg Monday evening. He intends (D.V.) entering the Manitoba college for the winter.

—Mr. Raymond, father of Mr. A. Raymond of the Leland, who has been seriously ill, is improving rapidly, we are pleased to say.

—Mr. Benj. Rogers, of Elzeley, died on Monday. His death was not altogether unexpected, as he has been ill for some time past.

—King Winter is making a gallant fight to retain his grip. Old King S.D., however, seems to be getting a little too strong for him.

—Mr. Thomas Johnston arrived back on Monday, from Ontario, where he has been spending the winter, looking hale, hearty and fat.

—We are pleased to place on our exchange list that excellent weekly, the Northwest Sportsman. Last week it contained an excellent picture of the Victoria hockey team, of Winnipeg, winners of the Stanley

cup and champions of the world. A copy of the Sportsman should be found in every club room. \$1 per year in advance.

—Dr. Sze Dentist, will be at the Leland Hotel, Qu'Appelle Station, April 13 and 14; Wolsley, 15 and 16.

—If the amount of business being done by Messrs. Bateman & Githamer, merchant tailors, is any criterion, they must indeed be masters of their art.

—Rev. A. C. Kettle, of Qu'Appelle, has been placed in charge of St. Alban's church, Mossburn, left vacant by the removal of Rev. W. T. Mitton to Winnipeg.

—Mr. G. S. Davidson is to be congratulated on his appointment to the position, held by the late Mr. Githamer, Inspector of Fisheries for the Northwest Territories.

—Mary C. Vahner, of Brandon, and Wm. Ingerson, of Shoal Lake, along with ten other relatives, share a fortune of \$8,457 left by Catherine Isabella Ingerson, of Toronto, who died on Jan. 21.

—On Friday last Wm. Reid and Wellington Hodgins, of Lucan, shipped two hundred head of cattle to Lethbridge, N.W.T. They were purchased chiefly in London, more than six thousand dollars being paid out.

—A Montana exchange says: Cattle are selling fat. Never before have range cattle been in such flesh during the winter as they are at this writing. At least 95 per cent of them are as fat as they have ever been.

—T. J. McBride, late manager at Winnipeg for the Massey-Harris Co., has been appointed assistant general manager of the company's business, and is now located at the head offices of the company in Toronto.

—His lordship, the bishop of Qu'Appelle, returned from Winnipeg, on Thursday last, and preached in St. Paul's, Regina, on Sunday last. Mrs. Burn is expected to arrive at Indian Head, from England, to day.

—Ball's stereopticon limelight and musical entertainment, consisting of story, scenes and songs of slavery and the South before and since the war, will show in the town hall on Saturday the 4th and Monday the 6th inst.

—Mr. H. Conolly has purchased Bell W., the black 5-year-old mare with a record of 2:17 3/4 as 4-year-old, from Mrs. Scott, of Qu'Appelle. It is understood that the amount paid for the animal was in the neighborhood of \$400.—Tribune.

—The morning service in the Presbyterian church, on Sunday morning last, was conducted by the Rev. Mr. Robson, of Indian Head, and in the evening by the Rev. Hunter Boyd. Excellent sermons were preached by both the rev. gentlemen and were appreciated by large congregations.

—The Qu'Appelle football club purpose holding a reunion on the 16th April, and it is to be hoped they will meet with success. The team last year did so well that our town may well feel proud of them; so let all do what they can to encourage the boys to keep up their excellent reputation.

Our townsman Mr. Johnston, tin-smith, has invented a camping cook stove. The advantages he claims for it are, that it has a cast iron top and the sides are of one piece. It has also an attachable apparatus for baking bread, etc. To all appearances it is a very desirable article for intending campers. Mr. Johnston intends to apply for a patent.

—Messrs. Thos. Portogallo and M. A. Carter, two noted musicians, reached our town Tuesday night and gave an entertainment in the Convention hall on Wednesday. As musicians they appear to have perfect control of their instrument, the harp and violin, and furnished some very fine music. Mr. Carter appeared to be able to use any kind of a bow, and played very nicely, using a pin, a tumbler filled with beer also with a gentleman's boot, playing a tune by using each of these articles mentioned as a bow. He of course drank the beer after playing a tune in that way, and we are inclined to think he would not have been displeased if the fiddle

—Awarded Highest Honors—World's Fair.

DR. PRICE'S CREAM BAKING POWDER

MOST PERFECT MADE.

A pure Grape Cream of Tartar Powder. Free from Ammonia, Alum or any other adulterant. 40 YEARS THE STANDARD.

The following contribution by one of our bachelors speaks for itself:

I care not whether the skies are blue,
Or the clouds glow black above me—
A sweet thought comes with the thought of you—
You love me, dear, you love me!

When the world is cold and its friendships few,
And toil is a vain endeavor—
A sweet voice sings to my soul of you,
And the world is sweet forever.

And love, my love, with the bright eyes true,
And the pink lips kind with kisses;
There is no love like my love for you—
No joy in the world like this.

And whether the skies are dark or blue,
With stars or stars above me—
My love is with me with the thought of you—
You love me, dear, you love me!

WAGHORN'S GUIDE AND TRAVELER, 50c

had been similarly constituted. Mr. Portogallo is quite a linguist, and was employed by the crown as interpreter in the noted Italian murder case tried at Grenfell two years ago.—Wolsley Echo.

—We are sorry to have to record the sudden death, on Thursday last, of Mrs. J. Cargo, widow of the late Mr. Cargo, who died at Fort Qu'Appelle on Saturday. The funeral service was held in the school house, Wide Awake, by the Rev. Mr. McCullough, Indian Head. Mrs. Cargo leaves a husband and three children, the youngest about three days old, to mourn her loss.

—Summer is coming, and the members of the Qu'Appelle football club are beginning to animate themselves, and are becoming alive to the importance of practice. The first practice game of the season will be played tomorrow (Friday) between the east and west sides of the town. The teams are very evenly matched and an exciting game is anticipated.

—Services are to be held daily this week, in St. Peter's church, at 10 a.m. and 7:30 p.m. On Good Friday service will be held at 10:30 a.m. and 7:30 p.m. Easter Sunday—Holy Communion at 8 a.m. and 11 a.m.; children's service, 3 p.m., evening service, 7 p.m. The Easter meeting for election of church wardens and vestrymen, on Easter Monday, at 7 p.m.

—A Free Press dispatch announces the death of F. C. Githamer, Government Inspector of Fisheries, at his home at Fort Qu'Appelle, at 8 o'clock last Friday of inflammation of the intestines. The government will find it a difficult matter to get as good a man for the vacant position. A keen fisherman himself, he threw himself with all his soul into the work of putting the protection and development of the fisheries of the Northwest on a satisfactory basis, and to his unwearied efforts is chiefly due the rising importance of the fishing industry of the country.—Edmonton Herald.

—Word has just been received in the city, says the Winnipeg Tribune, of the burning of Bishop Reeve's residence at Fort Simpson, on the Mackenzie river. The event occurred some time ago, and house and contents, which included all the supplies till next summer, were completely burned. The Bishop and Mrs. Reeve escaped with difficulty to the H. B. fort, where they are now staying. Bishop Reeve contracted a severe cold and rheumatism during the exposure. Their many friends in Manitoba and the Territories will regret to hear of this great loss which the bishop and his unwearied helpmate have sustained.

—The Commercial for March 23 draws attention to the fact that "now that seedling time is at hand again, it would be well for the press to call attention to the necessity for bluestone all seed grain. The loss from smut in wheat in the crop of 1895 will foot up to an enormous amount. The damage from frost is greatly exceeded by the damage from smut. It is estimated that it will cost only about one cent per acre to bluestone the seed, which is a mere trifle. On the other hand, wheat free from smut is worth from 8 to 15¢ per bushel more than a smutted sample, according to the amount of damage from smut. Some farmers still seem to doubt the value of bluestone as a preventive for smut, but the proofs of its complete ability to eradicate smut have been so abundantly demonstrated, that it seems that no reasonable person should entertain a doubt on this point. Some have failed to learn the value of bluestone because the work was carelessly done, and it should be understood that every seed should be thoroughly wet with the solution, of a proper strength, to secure the desired result."

—TORONTO, March 30.—Donovan Sills, a retired grain merchant, formerly in business in South Frodo, died at Kingston, is dead, aged 76.

—QUEBEC, March 30.—Col. G. Amoy, member of the Dominion parliament for Belle Chasse, was found dead at his residence this morning. He had been ill of a gripple, but was not considered dangerously ill. Death is supposed to have been caused by a sudden attack of congestion of the lungs.

NOTES BY THE WAY.

"There's a child among ye takin' notes, An' fail it he'll be out soon."

That most lively time of all the year, spring, is at hand, a time that brings joy and gladness, even to the meanest thing that crawls. Warmer and brighter days obtain, and Nature, refreshed by her long wintry sleep, is awakened from her slumbers; the sap of tree and scrub is again made to rise, the roots again take in nourishment from the soil, and again resolve that nourishment into sap, and the sap in turn discharges its many office in the vegetable economy; buds, leaves and fresh shoots put forth; the seeds begin to germinate, or, if it had begun to do so in the fall, and have remained dormant in the earth during the winter, resumes that wonderful series of processes by which it is to become a perfect plant. The hibernating animal, stimulated by the increase of heat and light, shakes off his lethargy, and comes again within the pale of active and productive existence. Nor are these two great agents without their influence on man; his circulation is quickened, his various functions are more vigorously discharged; his activity is increased; his desire for muscular exercise and the pleasure he derives from using his limbs are evidently and very sensibly augmented; his spirits are exhilarated, and he participates, in fact, in that chorus which universal nature pours forth from the very exuberance of its vitality. This is the effect of the return of spring, with its sunniness and its warmth-breathing winds, on those persons in good health, whose system is in such a state as to bear its stimulation.

It is remarkable what a great difference even the addition of a single letter will sometimes make to a whole sentence. For example, in the grounds of a certain English nobleman there happened to be fixed up in different parts of the gardens painted boards bearing the request: "Please do not pick the flowers without leave." Someone with a humorous bent procured a paint brush and added the letter "s" to the last word, the result being that everyone left the grounds with splendid bouquets.

Then again some words having double meaning are often ludicrously misinterpreted. A certain newspaper included a complimentary notice of a young schoolmistress with the words, "the reputation for teaching she bears." Words that certainly were not meant to convey the idea that the young lady in question was successful as a teacher of she bears.

The Commercial for March 23 draws attention to the fact that "now that seedling time is at hand again, it would be well for the press to call attention to the necessity for bluestone all seed grain. The loss from smut in wheat in the crop of 1895 will foot up to an enormous amount. The damage from frost is greatly exceeded by the damage from smut. It is estimated that it will cost only about one cent per acre to bluestone the seed, which is a mere trifle.
